📍 475/11 Chien Luoc, Binh Tri Dong A, Binh Tan, Ho Chi Minh City

INTRODUCE

Hello everyone,

My name is Trung, a Front-End Engineer with 7 years of experience, including 5 years specializing in ReactJS. I am passionate about building high-performance, scalable, and user-friendly web applications.

I am currently looking for new opportunities as a **Senior Front-End Engineer (ReactJS)** to expand my expertise, tackle challenging projects, and contribute to a dynamic team. With a deep understanding of React, Next.js, and modern front-end technologies, I am confident in delivering high-quality, maintainable code and seamless user experiences.

If you're searching for a skilled ReactJS developer to join your team, feel free to reach out to me. Looking forward to connecting!

Have a great day!

EDUCATION

FPT Polytechnic College   **2017 - 2020**

Website Design - Website Programming

- Before pursuing a career in web development and programming, I studied Information Technology at a Vocational School, where I gained a solid foundation in both hardware and software.
- During my studies, I developed a strong interest in Front-End Development, which led me to further my education at FPT Polytechnic.
- Consistently achieved excellent academic results throughout all semesters.
- Actively participated in extracurricular activities and school-led initiatives.
- Engaged in various programming clubs, collaborating with peers to improve coding skills and stay updated with the latest technologies.

Result and Rating: Graduated with Good, GPA 7.5

WORK EXPRRIENCE

Elinext Viet Nam, Ho Chi Minh City,   **06/2021 - 05/2025**

Developer ReactJS

- **Develop high-quality, scalable UI:** Convert designs from Figma or other design tools into responsive, pixel-perfect web applications using **ReactJS**, **Next.js**, **TypeScript**, **Tailwind** CSS or other modern front-end technologies.
- **Optimize performance & SEO:** Improve website performance, accessibility, and **SEO** by implementing best practices such as lazy loading, **SSR** (Server-Side Rendering), **ISR** (Incremental Static Regeneration), and client-side caching.
- **Integrate & manage APIs:** Work with **RESTful APIs** & **GraphQL** to fetch and display dynamic data efficiently, ensuring security and performance while handling data fetching, caching, and state management (**React Query, Redux Toolkit, Zustand,** etc.).
- **Implement complex business logic:** Translate client requirements into structured, maintainable, and reusable React components while following **SOLID** principles and best coding practices.
- **Collaborate with cross-functional teams:** Work closely with UI/UX designers, Back-end developers, and Product Owners to align the front-end experience with business goals and technical feasibility.
- **Enhance user experience (UX/UI):** Implement interactive and dynamic UI features using animations, transitions, and micro-interactions with tools like Framer Motion.
- **Write and maintain tests:** Ensure code reliability by writing unit tests, integration tests, and end-to-end tests using Jest, React Testing Library, Cypress, or Playwright.
- **Code review & mentoring:** Conduct code reviews, refactoring, and optimizations, mentoring junior developers, and ensuring high-quality, maintainable code.
- **Stay updated & innovate:** Research and implement new front-end technologies, frameworks, and tools to improve performance, security, and scalability.

- **Version control & CI/CD:** Use **Git**, GitHub Actions, or other CI/CD pipelines to automate builds, testing, and deployment.
- **Security & maintenance:** Follow security best practices to prevent vulnerabilities (e.g., XSS, CSRF, CORS) and ensure the maintainability of front-end codebases.
- **Migrate & refactor legacy code:** Upgrade and refactor existing codebases using modern **JavaScript/TypeScript** practices to align with project goals and long-term maintainability.
- Some typical projects about ReactJS and NextJS:

1. Exercise Software (https://exercisesoftware.com/):

Project content: software development project to help people exercise at home through the website, accounts are divided into 2 types: coaches and students, one coach can manage many student.

Number of project participants: 1 Front-end, 1 Back-end

Project completion time: 1 year

Project status: Completed

2. TIV

Project content: CMS development project for vending machines

Number of project participants: 2 Front-end, 1 Back-end, 1 Design

Project completion time: More than 2 year

Project status: Completed

3F Solutions(Google Partner), Ho Chi Minh City	01/2019 - 04/2021

Junior Front-end Developer

- Converted **PSD** and **XD** designs into fully responsive and pixel-perfect websites.
- Integrated and managed **RESTful APIs** to enhance website functionality.
- Developed and maintained various community-based websites, focusing on reading platforms, self-learning tools, and traffic analytics:
+ https://truyene.com/
+ https://fff.com.vn/
+ https://hutkhach.com/
+ https://webrank.vn/
+ ... and more
- Built and optimized traffic-driven websites for clients, helping them increase user engagement and conversions.
- Contributed to the development of cryptocurrency exchange platforms using **ReactJS (Junior level)**, including:
+ https://docs.nut.money/ (NUT MONEY)
+ https://moonship.finance/#/ (MSP)

Cánh Cam Argency, Ho Chi Minh City	12/2018 - 3/2019

Fresher Front-end

- Converted **PSD** and **XD** designs into fully responsive, pixel-perfect websites.
- Collaborated with the team to complete tasks and troubleshoot project issues efficiently.
- Designed **UX/UI** based on client requirements, ensuring a seamless and user-friendly experience.

RunTime VN, Ho Chi Minh City	8/2018 - 12/2018

Front-end Deverloper

- Converted **PSD** and **XD** designs into fully responsive, pixel-perfect websites.
- Gathered and implemented client feedback to refine and improve website design and functionality.
- Deployed **HTML/CSS** projects onto the **WordPress** platform, ensuring seamless integration and performance.

Landing Page VietNam, Ho Chi Minh City	4/2018 - 8/2018

Intern Front-end

- Converted PSD and XD designs into fully responsive, pixel-perfect websites.
- Continuously improved Front-end development skills and optimized development workflows.

SPECIALIZED SKILLS

Front-end Development: HTML, PUG, JADE, Twig, EJS, Handlebar,CSS (SASS, SCSS), JavaScript (ES6+), jQuery

UI Frameworks & Libraries: Bootstrap, Tailwind CSS, Ant Design, MUI, Shadcn

JavaScript Frameworks: ReactJS, NextJS, Redux (Senior), VueJS, Vuex, Nuxt, Vite

Mobile App: React Native

Testing & Automation: Jest, Playwright, Mocha

Backend & Databases: Node.js (Junior), MySQL, MongoDB, RESTful APIs

Version Control & Workflow: Git, Agile Development, CI/CD

Languages: English (Communication)

SKILLS

Programming:	Fluently use programming languages: Javascript, ReactJS, Vue, NextJS, VueX, Redux, ...
Algorithm	Mastering the knowledge of algorithms, ensuring a good performance, can be applied to real projects
Communicate	Communication is also a skill that programmers need, so that you can not be isolated in an office environment and I have that skill.

INTERESTS

Music Enthusiast: Passionate about playing guitar and singing.

Gaming: Enjoy exploring new games and staying updated on gaming trends.

Music & Audio: Love listening to various music genres for relaxation and inspiration.

Tech & Learning: Continuously improving coding skills through tutorial videos and self-learning.

Team Engagement: Actively participate in collective activities with colleagues to build a positive work environment.
